Encoding a descriptor and controlling generated structures are separate tests
VAL MSE (within-cell standardized C_s)
condition only
posterior mu plus condition
mu fitted probe on posterior sample
mu fitted probe on independent prior
AR (no z)
CVAE D1
CVAE D2
CVAE D4
Cyclic D2
Physical z
Condition control
Shuffled control
Actual generated C_s change vs clamp-only
1e−5
lower quartile
upper quartile
